Fast track your Retail or B2B ecommerce

RED technology.com

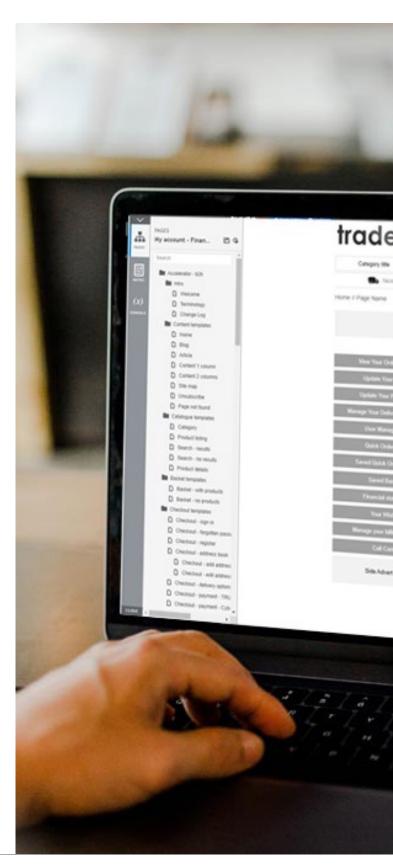

Fast track your Retail or B2B ecommerce

Drawing on the experience gained building and supporting hundreds of ecommerce websites over the last 15+ years, we have created the Retail & B2B Accelerators, our pre-configured ecommerce storefronts. Use the ecommerce Accelerators to launch proven Retail or B2B ecommerce sites, straight out of the box. Designed to grow with your business, the Accelerators come with all the tools you need to fast track your ecommerce.

The Accelerators are responsive websites geared towards the particular requirements of the Retail or B2B markets, with a layout which uses current best practice in content-led design and user experience (UX). They support the latest browsers & devices and have been developed using the latest front-end technologies. Having worked on a large number of B2B and Retail ecommerce builds, the Accelerators have been specified and developed with the most common, useful and relevant functions available out of the box.

The Accelerators include tailored, enhanced ecommerce features which allow us to deploy complete ecommerce solutions at a low cost. We are able to quickly launch fully branded, feature-rich online stores which have been tested, optimised and are proven to deliver an optimum experience to the user, without building them from scratch. The closer you stick to the standard Accelerators, the quicker and cheaper they are to deploy. They have also been designed with the future in mind and can be easily scaled and extended to match any business requirements, in line with the growth of your ecommerce channels.

Speak to us today about launching your new B2B or Retail ecommerce channels(s) using one of our Ecommerce Accelerators.

## **Ecommerce** Accelerators Fast track your Retail

Combining one of our Retail or B2B ecommerce Accelerators with our tradeit ecommerce platform gives you an enterprise-level ecommerce solution quickly and at a lower cost.

#### **B2B & Retail ready**

Designed and built for the separate requirements of both B2B and Retail ecommerce.

#### **Quick & low cost of deployment**

As the storefront and most integrations are pre-configured, sites are much quicker and more cost-effective to launch, with additional sites even more so.

#### Fully optimised and tested

Save vital time and money - the Accelerators are already optimised for SEO and tested across multiple breakpoints/ device types before you start.

#### **Personalised**

Using the Accelerators doesn't mean compromise, they can be customised in-line with your brand and requirements.

#### **Fully functioning**

The Accelerators are tied to the tradeit platform, meaning you can take advantage of the CMS, Marketing platform and Order Management System, so there is no loss of ecommerce functionality.

#### Easily customised, scaled and extended

Designed to grow with your business, meaning sites can be customised, extended and expanded after launch.

## **Content Management System (CMS)**

The flexibility of **trade**it's CMS means that new or existing content pages can be created or edited with ease, giving non-technical users the ability to create stunning pages. The Accelerators contain multiple different conditional components each with elements that can be used to populate pages including sliders, carousels, videos, forms, blog posts and many more.

- Full in-page editing
- Roles-based user control
- Pre-defined, tested and optimised page templates (content, catalogue, checkout, my account, offline and emails).
- Selection of flexible, responsive in-site editing components (including pop-up) to create stunning content pages.
- Full control over headings, links, text and media (including video).
- Page flyouts for search, call centre, product content, and filtering on blog & articles to aid mobile experience.
- Pre-built cookie consent component.

## **Under the hood**

- Optimised front-end code written using latest techniques for creating responsive websites.
- Widget-based, constructed CSS resource files using SASS.
- Designed to meet Google Web Vitals' standards.
- AJAX basket on product details and product listings pages.
- Responsive design using HTML5, CSS3, JQuery & Javascript.
- Dependency handler controlling CSS and Javascript code minification and minimising the number of http requests.
- Latest solution for delivering responsive, optimised images.

### **Ecommerce Templates & Conditional Components**

All content pages within the Accelerators have been built around templates which control the structure and layout, making sure content is correctly displayed and formatted. The templates have been designed to deliver the best user experience but still allow personalised content to be displayed across the site using conditional components. The templates cover all content and catalogue pages, all checkout pages, my account pages, offline pages and email templates. However, these pages can be customised using your designs, fonts, colour schemes etc... in order to meet your brand guidelines and ensure your site is unique.

## **Conditional Components**

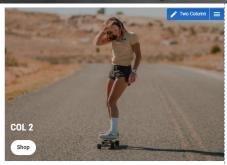

#### **Example components**

Produce media-rich, personalised content with the Accelerator's pre-built personalisable components which can be displayed on numerous conditions or combinations of conditions

### **Enhanced SEO**

**trade**it is incredibly search engine friendly and gives you full control over all of the on page elements including meta data, page title tags and URLs. In addition to the on page controls merchants can also maintain links, using broken link reporting to help avoid having broken user journeys. The WCM also provides management interfaces for handling 301 redirects, helping ensure that you maintain your positions within search engines for a smooth transition when moving your site and when making changes.

- Editable URLs/Permalinks for products, categories and content pages.
- Automated, customisable meta tags for products & categories.
- Redirects controlled via **trade**it's admin.
- Canonical product URLs, default product categories.
- Editable meta tags for content pages.
- Schema.org, Twitter card rich snippets.
- Automated Google site map generator.
- Editable meta titles for product and category pages.
